

## ASSIGNMENT -6

1. Perform the following activities using the vi commands.

2. Open an vi editor in linux

3. Type some some paragraph of arbitrary text.

```
anjalikumari@DESKTOP-D58MQ92: /mnt/e/iiht
anjalikumari@DESKTOP-D58MQ92:~$ cd /mnt
anjalikumari@DESKTOP-D58MQ92:/mnt$ cd e
anjalikumari@DESKTOP-D58MQ92:/mnt/e$ cd iiht
anjalikumari@DESKTOP-D58MQ92:/mnt/e/iiht$ ls
names.txt  newFile.txt  profiles  vifile.txt  vifile.txt
anjalikumari@DESKTOP-D58MQ92:/mnt/e/iiht$ vi vifile.txt
```

The default editor that come with the UNIX operating System is call vi editor.  
Visula Editor using vi editor we can edit an existing file and create a new file rom a scratch,we can also use this editor to just read the command .  
It is a imporved version of vi editor which is call the VIM and also been availabe for creteaing new file,updating, deleteing text and many other operation.  
It is more user friendly that other editors such as ed or ex editors.  
There are some features of vi editor  
1. It is generally considered the defator in UNIX editor because of all the flavors of the UNIX System.  
2.It is used to implement very similar accross the board.  
3. It redquired very few resources

4. Deletes a line and Deletes 'n' lines

```
anjalikumari@DESKTOP-D58MQ92: /mnt/e/iiht
```

The default editor that come with the UNIX operating System is call vi editor.  
Visula Editor using vi editor we can edit an existing file and create a new file rom a scratch,we can also use this editor to just read the command .  
It is a imporved version of vi editor which is call the VIM and also been availabe for creteaing new file,updating, deleteing text and many other operation.  
It is more user friendly that other editors such as ed or ex editors.  
3. It redquired very few resources

5. copies a line and Copies 'n' lines

```
anjalikumari@DESKTOP-D58MQ92: /mnt/e/iiht
```

The default editor that come with the UNIX operating System is call vi editor.  
Visula Editor using vi editor we can edit an existing file and create a new file rom a scratch,we can also use this editor to just read the command .  
It is a imporved version of vi editor which is call the VIM and also been availabe for creteaing new file,updating, deleteing text and many other operation.  
It is more user friendly that other editors such as ed or ex editors.  
1. It is generally considered the defator in UNIX editor because of all the flavors of the UNIX System.  
2.It is used to implement very similar accross the board.

6. pastes the copied or deleted text

—  —

10  
 11  
 12  
 13

## 7. Insert a word into a line

100

8. Move the cursor left, right, up and down using the commands

—  

```
anjalikumari@DESKTOP-D58MQ92: /mnt/e/iiht
```

—  

```
anjalikumari@DESKTOP-D58MQ92: /mnt/e/iiht
```

—  

\_\_\_\_\_

anjalikumari@DESKTOP-D58MQ92: /mnt/e/iiht

```
Th default editor that come with the UNIX operating System is call vi editor.
Visula Editor using vi editor we can edit an existing file and create a new file rom a scratch,we can also use this editor to just read the command .
It is a imporved version of vi editor which is call the VIM and also been availabe for creteaing new file,updating, deleteing text and many other operation.
It is more user friendly that other editors such as ed or ex editors.
